Container 2.0 Instruction Manual

Container 2.0 is a 6”x5”x12” liquid container designed to work with the Dosing Pump (IV Dosing Pump Master) to contain up to 2 supplements. Container 2.0 has 2 chambers with each chamber holds 2 liters of liquid.

**Installment**

1. Place the liquid container in a stable position.
2. Remove the cover from the top of container.
3. Pour the supplement slowly into each chamber.
4. Unscrew the cap of the tube connector.
5. Insert the tube through the cap.
6. Connect the tube to the connector of Container 2.0.
7. Turn the cap clockwise to lock the tube in place.
8. Connect the other end of the tube to the intake tube (left side) of Dosing Pump.
9. Refill the supplements when needed.
